Vulnerability Research on private program

## 1. No rate limit on otp verification process on user verification system which can lead to otp bypass.

Step to Reproduce:-

1) Create an account with your email.
2) It will send an opt to your email collect the otp.
3) Enter a random otp of 6 digit.Before submit intercept the post request which contain the otp.Sent it to intruder.
4) In intruder brute force the otp with number.(For this poc I just brute force the last three digits from 750 to 780 as I know the otp).
5) Then you will be able to bypass the otp.(otp never expired)

2. Weak password poliecy --> password validation happens on frontend only.

Step to Reproduce:-

1) Log in to your account.
2) Go to account setting.
3) Click password to reset password.
4) Enter old,new and confirm password and intercept this request with burp .After intercepting this request modify the new password and confirm password in such a way so that there is no upper case letter.(In the password setting rules it was said one must be upper case letter,one number,one special character)
5) Now try to log in with you new password.
6) You will see that you can login.(That's mean password validation is occuring only client side)

4. Broken Access Control --> any user can modify other users portfolio info

Step to Reproduce:-

1. Create two accounts.
2. Login in any account and go to account setting.
3. Try to modify the personal information and intercept this request with burb.In burp you will see user_id parameter in this put request.Note that user_id.
4. Now login into another account and go to account setting page.Try to modify the personal info like the previous one and capture the request in burp.Here you also see another user_id.Now change the user_id with the previous user_id.Modify any information you like and make a note the change you made.
5. Finally login into your first account and go to the acount setting>personal info.Then you will notice that the information is modified by the information which you modify from 2nd account .
6. That's mean you can modify personal info of others.

6.File upload vulnerability

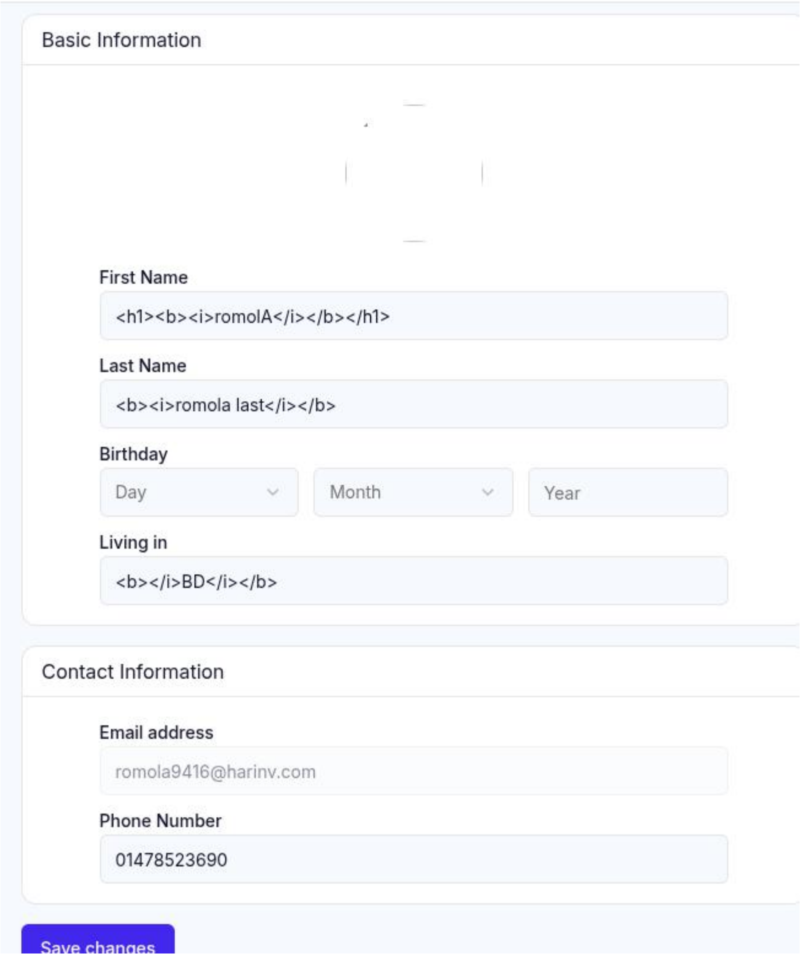
Step to Reproduce:

1. Log in and go to your account.
2. Go to My portfolio.
3. Try to upload any kind of file.
4. You will notice no restriction to upload a file.

7.Email injection modifying the first name reflect on email in emailbox.

Step to reproduce:-

1. Login to your account.
2. Go to My Account>> Account settings >>Personal Info.
3. Update your info.
4. Now logout
5. Go to login page again.
6. Click forgotten password and enter your email.
7. You will receive an email. Notice the email here you will see that the modification you made with your first name is reflected here and html tag also implemented here.(In our case we use <h1> <i> tag and it works here.)



Basic Information

## Verification Needed

Dear

***romolA***

,

We have received a sign-in request from:

Account: **romola9416@harinv.com**

Time: **2025-04-12 08:17:15 GMT+6**

Location: **Dhaka, Bangladesh**

To ensure the security of your account, we've generated a One-Time Password (OTP) for you. **Your OTP is**:

*4* *0* *9* *3* *4* *1*

This is valid for the next 10 minutes. Please enter the **OTP** to proceed with your action.

If you do not recognize the sign-in request, please ignore this email or contact our support team at support@opedemy.com.

8.Broken Access control-One student can modify other students info.

Step to Reproduce:-

1. Create two  accounts.
2. login to any account as you like.
3. Go to My account>>My portfolio>>Education.
4. Enter your info .(Follow step 2,3 and 4 for both accounts).
5. Now you have educational info in both of your accounts.
6. Login to any account and try to edit education info  intercept  this request.You will notice there is a put request and here you will see you modified info with your user id note this user id (not the only id).
7. Now login to your 2nd account and edit your educational info and intercept this request.Here you will see your modified info with your user id.Now swap your use id with your previous user id and forward the request.
8. Logout from your 2nd account and login to your 1st account and look your educational info.You will notice the modification you made for 2nd account is modified for 1st account.
